Subject: DOJ wants to hear from you on MS settlement

I feel that the government should settle in favor of Microsoft. Actually I think the matter should have never come to court. All this crap about the browser being packaged with the OS is nonsense. I use Windows 98 on my home computer and have both Internet Explorer and NetScape on the same computer. I can choose to use either one. Its up to me. I have said this before. Try to buy a new car from any car dealer with an engine or other parts from a different dealer and see what you get. Its going to be a big nothing that's what. Why? Because business is not done that way. Try to buy a new car without an engine. They will probably sell it to you but guess what? It will cost a lot more money because of all the special handling that will be required to get it to you.

This whole thing is just the result of some people who weren't in the right place at the right time or didn't make the right decision.

Throw it out of court. Stop wasting my tax dollars on it and lets get on with life.
